# AIIMS Patna Sarthi - business plan (1 page)

Hospital navigation aur OPD saathi app | Abhinav Kumar | 22 October 2026

## Ek line me

Ek aisa app jo sarkari hospital me pehli baar aane wale mareez ko - uski apni bhasha me, bina internet bhi - gate se lekar report aur agli visit tak raasta dikhaata hai.

## Problem

AIIMS Patna jaise bade hospital me mareez rasta bhatakta hai, token/katar ka pata nahi chalta, janch aur report ke liye baar-baar poochhna padta hai, aur signboard angrezi me hote hain. Isse mareez ka waqt barbaad hota hai aur staff par bojh badhta hai.

## Solution

- Andar ka navigation - floor plan, AR camera aur QR scan se rasta.
- Live token aur katar - number aur intezaar ka samay.
- Janch, payment aur report - sab ek jagah, ek hi flow me.
- 4 bhashaayein (Hindi, Bhojpuri, Maithili, English) aur offline support.
- Sabke liye - bada text, dark mode, voice guidance.

## Kaun use karega aur kaise chalega (model)

- Pehle istemaal: AIIMS Patna - ek OPD me pilot.
- Kaam karne ka tarika: hospital/institution ke liye saalana licence (SaaS); mareez ke liye muft.
- Aage: doosre department aur doosre sarkari hospital, phir rajya ke bahar.

## Ab tak ki sthiti (traction)

- Working prototype - 136 screens, poora mareez safar.
- 4 bhashaayein, offline aur accessibility mode.
- APIC 2nd Call me aavedan; regulatory readiness workshop (24 Oct) ke liye chuna gaya.

## Team

Abhinav Kumar - product aur development. Aage: ek clinical saathi (doctor) aur ek mentor chahiye.

## Ask (kya chahiye)

- Ek OPD me pilot ki ijazat aur ek clinical saathi.
- Incubation support aur ek mentor.
- Funding - BIRAC BIG (Rs 50 lakh tak, 18 mahine, equity-free) ke liye taiyari.
- Regulatory - CDSCO se SaMD classification par saaf jawab.

## Roadmap

| Padav | Kya hoga |
|---|---|
| Ab | Prototype taiyaar; demo aur feedback. |
| Agla | Ek OPD me pilot; staff feedback; sudhaar. |
| Uske baad | Hospital system (token/ABHA) se jodna, ijazat ke saath. |
| Aage | Naye department aur hospital; licence model shuru. |
